ACTIVITY NO. 1 Pivot Charts

1. PROCEDURE OUTPUT

Provide a lab report on the assigned module from the **Introduction to Data Science Course** and go to Module 1.3.8 Lab - Pivot Charts for the Hands-on Activity, complete the activity and use the format below.

Part 1

Conclusion:

In part 1 it first helps me to execute in order to visualize the data given, and gives me an introduction when analyzing tables by creating a chart for it. This activity also helps me to organize data and make it easy to understand. Furthermore, I did notice that when it comes to making a chart you should be careful because it may not show the right visual representation.

Conclusion:

In part 2 this is where a huge amount of data is being interpreted and try to create a chart of it. This guided me to analyze data that is full of information accurately, and precisely using charts and labeling it, it also teaches me to try analyzing an image without any context and labels. So, context is really important when presenting data on charts.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Part 3

Conclusion:

In this part (3) this helps me understand a problem and solving concept, by being a business minded person, it teaches me to analyze the data according to its situation and solving a problem from it. Additionally, it is very helpful when creating a chart specially when you are analyzing two or more data or information. But of course we should be mindful when interpreting data.
